(pentobarbital sodium) Injection, USP

Nembutal pentobarbital is administered to euthanize animals and has often been given to patients seeking assistance to commit suicide. Buy nembutal sodium pentobarbital online at moderate prices.

Generic Name: Pentobarbital

Brand Name: Nembutal Sodium

Type of Drug: Barbiturate and anti seizure medication

General Information

FDA approved for use in veterinary medicine(nembutal pentobarbital). Class II controlled medication used in a hospital setting. It is used to treat seizures that need longer control than diazepam (Valium) offers, and faster control than phenobarbital offers.

Usual Dose and Administration

Used in hospital setting. Given by injection into a vein to effect (given in small amounts until seizures stop).

Side Effects of nembutal pentobarbital

Nembutal pentobarbital Decreased rate of breathing and loss of body temperature. May see excitement in dogs recovering from its sedative effects.

Contraindications/Warnings

Do not use in patients who are hypersensitive (allergic) to barbiturates.

Not for use in patients who are dehydrated, anemic, or who have Addison's disease, heart or lung disease.

Do not use in patients with kidney or liver disease.

MUST be given SLOWLY due to respiratory depressant effect.

Do NOT use to treat lidocaine intoxication (toxicity from lidocaine, a medication used for anesthesia and to treat certain heart problems).

Not for use in pregnant or nursing animals.

Drug or Food Interactions

Pentobarbital's effect may be increased if used with phenobarbital or other central nervous system (CNS) depressants, valproic acid, or chloramphenicol.

May decrease the effect of oral anticoagulants, corticosteroids, beta blockers, quinidine, theophylline, or metronidazole.

Increased risk of low blood pressure if used with furosemide (Lasix).

May change the metabolism of phenytoin.

Deaths have occurred when used to treat lidocaine induced seizures.

No known food interactions.

Form and Storage

Buy nembutal sodium pentobarbital, capsule, elixir, and rectal suppository

The suppositories should be refrigerated. The other forms should be stored at room temperature unless otherwise indicated by the manufacturer.

Indications for Use

nembutal pentobarbital Used for short-term control of status epilepticus, cluster seizures (multiple seizures in a short amount of time) in dogs. Also used for similar seizures in cats.

Overdose/Toxicity

May see sedation, coma, decreased rate of breathing, and death.
